EDUCATION

Bachelor of Engineering

Computer Science and Engineering

B.K. Birla Institute of Engineering and Technology, Pilani, Rajasthan

2012 - 2016

SKILLS

- Angular
- React
- AWS
- Java
- Spring Boot
- Quarkus
- Typescript
- Javascript
- GIT
- Docker
- Argo CD
- Postgres / SQL
- Scrum / Agile
- Kafka
- JIRA / Confluence
- CI/CD
- Prompt Engineering
- Generative AI

LANGUAGES

- German (B1)
- English
- Hindi

INTERESTS

- Table Tennis
- Cricket
- Music

WORK EXPERIENCE

Full Stack Developer

Jun 2023 - Today

Donat IT, Ingolstadt, Germany

- Led the migration of a monolithic application to a microservices-based architecture, improving system performance by 40% and enhancing scalability, maintainability, and deployment efficiency. Enhanced **Angular**-based frontend modules.
- Designed backend services using **Java, Spring Boot, and Quarkus** with clear API boundaries, clean architecture principles, and scalable data access patterns. Integrated AWS services including EC2, S3, RDS, CloudWatch, and OpenSearch to support cloud deployment, monitoring, logging, and operational visibility.
- Designed and documented APIs using **OpenAPI/Swagger**.
- Worked with **Kafka**-based event-driven communication to decouple services and improve asynchronous processing.

Senior Project Engineer

Jan 2022 – Nov 2022

Wipro Limited, Bangalore, India

- Developing a flexible and well-structured, easy to maintain and highly modularized front-end architecture.
- Mentored teams in **Angular**, promoting best practices and scalable frontend development.
- Building web services using **RESTful API, SOAP API**.

Software Developer

Oct 2016 - Dec 2021

Accenture, Malaysia

- Hands-on software development with Angular, HTML5, CSS, Java, and JavaScript.
- Development, testing of individual components, debugging of existing code and integration of components to complete full flow and implementing solutions using **OpenText App Works, Entity Modelling, OAuth & Single Sign On (SSO)**.

PROJECTS

Auto Leasing Web Application

Designed and developed a leasing platform with backend APIs for rental calculation, contract handling, maintenance costs, and TÜV fees.

Automotive Maintenance Hub

Developed an internal platform for managing manufacturing processes, parts inventory, BOM tracking, and supply-chain integration, supporting structured data management and operational transparency.

Accrual System for Group Finance

New accrual system with portal, monitoring dashboard and workflow features to ease review and approval processes and to optimize the Accrual Template for CAPEX, OPEX, REVENUE transactions.

Centralized Tax System

Creation of portal for different tax classes under Petronas and automation of task done by tax classes to back-charge the Operating Petronas Units. Implementation of time tracking system, notes, outlook integration and audit trails for case/transaction.
